

Final Project Guidelines

Create a presentation to the sixth graders persuading them to help send a student to school in Kenya so you can help change the community for the better. Your presentation must include the following components:

Introduction- why are you doing this?

Geography- What is the geography of Kenya? How does it affect their community? How can an educated member of the Kenyan society help influence change in this situation?

Economics- What is the current state of economics in Kenya? How does this affect their community? How can an educated member of the Kenyan society help influence change in this situation?

Civics- What is the current state of the government in Kenya? How does this affect their community? How can an educated member of the Kenyan society help influence change in this situation?

Closing- Why do the sixth graders need to come up with a fundraiser to help send students to school in Kenya?

Your presentation should be well organized and written in a persuasive manner. It needs to be developed using a Web 2.0 tool and all students need to be ready to share their contribution to the project and the final presentation. EFAC DREAMS will post final presentations that demonstrate all of the criteria listed above in a creative, innovative way.
